Subject: Amendment to 2010-11 MRP Annual Report: City of San Bruno

Dear Mr. Wolfe,

This letter serves to formally amend the City of San Bruno's 2010-11 MRP Annual Report regarding Provision C.5.e.iii. - Collection System Screening Program. This amendment is in response to a request for clarification received from your office on December 19, 2011.

The section of the annual report titled C.5.e.iii-Evaluation of Collection System Screening Program has been revised as shown below. Note that the first paragraph is the new language, with the original language remaining in the second paragraph.

The City of San Bruno inspected 842 catch basins, with 108 requiring cleaning. Catch basins are cleaned as part of an annual fall catch basin cleaning program that generally begins between the middle of August to the beginning of September and lasts approximately two months. Additional cleaning of catch basins is performed throughout the year as needed. No significant problems were encountered during catch basin inspection and cleaning activities. The City also performed an inspection of the Cresmtoor Canyon outfall—the City's only outfall—shortly after the September 9, 2010 PG&E transmission line explosion and fire to confirm that the outfall and associated collection main was not damaged.

Maintenance crews routinely check for illicit discharges while performing their daily work activities. The City is continuing to modify its Computerized Maintenance Management System by adding a GIS component, and continues to capture time spent screening for illicit discharges. The CMMS has the ability to track work orders and hours spent on specific activities. After additional training, the City will customize the CMMS to fit the needs of accurate tracking.

Thank you for allowing this opportunity to amend the City of San Bruno's 2010-11 Annual Report. Should you have any questions or require additional clarification, please contact me at (650) 616-7067 or kfabry@sanbruno.ca.gov.

Sincerely,

Klara A. Fabry
Public Services Director
